HD

Heavy-duty Synthetic

TRIM® HD is a synthetic (chemical surface active) coolant concentrate used for general machining and grinding of ferrous materials. It utilizes a heavy-duty, chlorinated EP additive package for improved performance on stainless steel, super alloy, and most soft aluminum.

Synthetics

Peak your performance:

TRIM® clean-running synthetics contain little-to-no oil. They are hard-water tolerant with good corrosion protection. Plus, synthetics leave very low residue for easy cleaning. Paired with extremely low carryoff, synthetics translate to less maintenance and lower operational costs, saving you time and money. Run clean and long with TRIM synthetics.

Choose HD:

- Provides rapid and effective cooling and reduces machining forces through the use of EP additives and boundary lubricants
- Has superior anti-weld action to control built-up edge and chip welding
- Compatible with all ferrous and most nonferrous materials
- Broad range of applications by using different concentrations for different applications
- Fully compatible with most nonmetallic materials
- A superior product for low-speed, high-pressure operations such as production band sawing and drilling
- Will keep your machines clean while leaving a soft, fluid film that protects the bare metal parts of your machine tools

HD especially for:

Applications — band sawing, drilling, grinding, high-pressure, and machining
Metals — aluminum, ferrous metals, most nonferrous metals, nonmetallic materials, stainless steels, and super alloys
Industries — aerospace and automotive
HD is free of — oil
Application Guidelines

- The minimum recommended concentration is 5% on all materials; however, higher concentrations give better sump life, tool life, and corrosion control.
- HD at higher concentrations or in the neat form is effective in light- to moderate-duty stamping, drawing, and forming.
- HD works best when used in high-speed machining situations; however, at higher concentrations (7.5% plus), it exhibits significant levels of slip lubrication.
- HD is not recommended for use on reactive metals (i.e., magnesium or zirconium).
- For additional product application information, including performance optimization, please contact your Master Fluid Solutions' Authorized Distributor at https://www.2trim.us/distributors.php, your District Sales Manager, or call our Tech Line at 1-800-537-3365.

Physical Properties Typical Data

- Color (Concentrate): Cream
- Color (Working Solution): Opaque
- Odor (Concentrate): Mild pine
- Form (Concentrate): Liquid
- Flash Point (Concentrate) (ASTM D92-90): > 208°F
- pH (Concentrate as Range): 8.4 - 9.0
- pH (Typical Operating as Range): 8.3 - 8.9
- Coolant Refractometer Factor: 2.7
- Titration Factor (CGF-1 Titration Kit): 0.68
- Digital Titration Factor: 0.0196
- V.O.C. Content (ASTM E1868-10): 73 g/l

Recommended Metalworking Concentrations

- Light duty: 5.0% - 6.5%
- Moderate duty: 6.5% - 8.5%
- Heavy duty: 8.5% - 10.0%
- Design Concentration Range: 5.0% - 10.0%

Health and Safety

Mixing Instructions

- Recommended usage concentration in water: 5.0% - 10.0%.
- To help ensure the best possible working solution, add the required amount of concentrate to the required amount of water (never the reverse) and stir until uniformly mixed.
- Use premixed coolant as makeup to improve coolant performance and reduce coolant purchases. The makeup you select should balance the water evaporation rate with the coolant carryout rate. Use our Coolant Makeup Calculator to find the best ratio for your machine: apps.masterfluidsolutions.com/makeup/.
- Use mineral-free water to improve sump life and corrosion inhibition while reducing carryoff and concentrate usage.

Additional Information

- Use Master STAGES™ Whamex XT™ for a quick and thorough precleaning of your machine tool and coolant system.
- Consult Master Fluid Solutions before using on any metals or applications not specifically recommended.
- This product should not be mixed with other metalworking fluids or metalworking fluid additives, except as recommended by Master Fluid Solutions, as this may reduce overall performance, result in adverse health effects, or damage the machine tool and parts. If contamination occurs, please contact Master Fluid Solutions for recommended action.
