**Whamex™**

*Machine Tool Sump and System Cleaner*

Master STAGES™ Whamex™ is a safe, fast-acting concentrated formula that will save machine cleaning downtime while removing the oily residues, scums, and insoluble soap deposits that reduce coolant life. Whamex is made for cleaning out machine tool sumps and larger systems, coolant supply lines, and coolant recycling equipment. Whamex is compatible with most waste treatment (including ultrafiltration) and will not degrade TRIM® metalworking fluids when used as directed.

### Maintenance

**Choose Whamex:**
- A very specialized formula that draws many years of hands-on experience in machine clean outs
- Quickly breaks down and lifts off insoluble scum deposits hidden in lines and difficult to reach areas — getting rid of these residues is one of the best ways to extend coolant life in your system
- Very hard water tolerant allowing it to be effective in raw water or used coolant
- Environmental approvals are simplified because Whamex contains no nitrites, phosphates, barium, phenols, or butyl cellusolve; this formula has very low V.O.C. content and no SARA 313 reportable ingredients
- When used as directed below, this product is compatible with TRIM brand semisynthetic and soluble oil coolants, as well as most competitive coolants. Will remove heavy soils from machines without affecting paints, coatings, seals, hoses, or skirting, and it won’t leave a slippery residue
- Short-term corrosion inhibitors prevent flash rusting of machine surfaces and ways

**Whamex in action:**

An Illinois customer had a 10,000 gallon central system used for centerless grinding of piston pins. The finishes were critical, but they were experiencing problems with a soluble oil coolant: finish quality was decreasing as tramp oil was increasing. Rather than dumping the system, 1% Whamex was added with amazing results. Part finish improved from 6 to 2-4 microns; tramp oils split out. After seeing dramatically longer sump life, the production manager stated “instead of dumping the system, it is still running parts with excellent finishes and no coolant problems.”

**Whamex especially for:**

**Applications** — floor cleaning, immersion tanks, machine cleaning inside, and machine cleaning outside

**Soils** — coolant residues, heavy oils, and light oils

**Metals** — cast iron and steels

**Industries** — aerospace, automotive, machine tool manufacturers, and medical

**Whamex is free of** — 2-butoxyethanol (Butyl), barium, nitrites, NPEs, phenols, phosphate, and SARA 313 listed ingredients

An Illinois customer had a 10,000 gallon central system used for centerless grinding of piston pins.
Whamex™
Machine Tool Sump and System Cleaner

Application Guidelines

- Use a high-flow sump cleaner such as a Yellow Bellied Sump Sucker™, to quickly remove spent fluids and residues.
- Add up to 0.1% Master STAGES™ CLEAN DF1 to control foam in high-pressure, high-flow systems.
- All used coolant or rinse water must be recycled or disposed of in accordance with local, state, or provincial, and national environmental regulations.
- To learn about the "Preferred Method for Cleaning Machine Tools and Central Systems"; and the "Quick Cleaning Method For Noncritical Interim Cleaning" check out pages 10-12 of the The Handy Pocket Guide to a Clean Shop.
- For additional product application information, including performance optimization, please contact your Master Fluid Solutions' Authorized Distributor at https://www.2trim.us/distributors.php, your District Sales Manager, or call our Tech Line at 1-800-537-3365.

Additional Information

- Industrial Use Only
- Consult Master Fluid Solutions before using on any metals or applications not specifically recommended.
- This product should not be mixed with other metalworking fluids or metalworking fluid additives, except as recommended by Master Fluid Solutions, as this may reduce overall performance, result in adverse health effects, or damage the machine tool and parts. If contamination occurs, please contact Master Fluid Solutions for recommended action.
